DETAILED ACTION

This Office Action is in response to the papers filed September 10, 2003. Claims 1-28 are pending.

Election/Restrictions

This application contains claims directed to a genus encompassing numerous species of agents that attenuate annexin function.

The search for all species of compounds useful in the treatment herein presents and undue burden on the office due to their wide-ranging variations in structure of actives useful herein and their correspondingly separate and distinct fields of search. It is noted that the species of the instant invention are drawn to a method of treating a subject by administering compositions comprising a broad range of compounds. For example, a treatment comprising the administration of a composition comprising compound V would be classified in 514/212.07, a treatment comprising the administration of a composition comprising compound VII would be classified in 514/211.09, etc.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-16, 18-25, 27 and 28 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim

is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call to the attorney is not required where: 1) the restriction requirement is complex, 2) the application is being prosecuted pro se, or 3) the examiner knows from past experience that a telephone election will not be made (MPEP § 812.01). Therefore, since this specie election is considered complex, a call to the attorney for telephone election was not made.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gregory W Mitchell whose telephone number is 571-272-2907. The examiner can normally be reached on M-F, 8:30 AM - 4:30 PM.
